REGIONAL ENGINEERING INTERFACE

Global composite capability, delivered with a local point of accountability.

SupraComposites connects industrial buyers in Bosnia & Herzegovina, the Western Balkans and the European Union with an extensive composite-material, tooling, equipment and component portfolio. Each program is scoped around application requirements—not a generic stock code.

97 CATALOG PRODUCT FAMILIES	3 COMMERCIAL LANGUAGES	SI METRIC-FIRST TECHNICAL DATA	1 REGIONAL ENGINEERING INTERFACE
---------------------------------------	----------------------------------	--	--

Program approach

- ✓ Application and load-case review
- ✓ Material / resin / architecture alignment
- ✓ Metric geometry and tolerance definition
- ✓ Certificate and compliance package confirmation
- ✓ Sample, pilot and production supply planning

SUPPLY MODEL

Configured around the project.

Final mechanical values, tolerances, certifications and declarations are tied to the selected manufacturer, grade, lot and intended use.

NO UNSUBSTANTIATED COMPLIANCE CLAIMS

 BOSNIA + EU

One technical conversation from concept to delivered configuration.

01

Regional sourcing

EU and Western Balkans coordination through a Sarajevo commercial and technical interface.

02

Program logistics

Planned sample, pilot and production deliveries with project-specific lead-time alignment.

03

Metric engineering

Dimensions, mass, strength and thermal requirements documented in SI units.

04

Tooling & process

Molds, fixtures, autoclave, RTM, winding and supporting production-equipment pathways.

05

Document control

Grade-, manufacturer-, lot- and application-specific evidence packaged with the offer.

06

Consolidated supply

Materials, core, consumables, tooling, equipment and manufactured parts in one portfolio.
