

Putty

Auxiliary Materials for Molding / SC-FCF4F5891FE6

PRODUCT OVERVIEW

Putty is a high-performance material used for repairing, filling, and enhancing surface defects of molds. It is mainly used to fill defects such as air holes, scratches, and cracks on the mold surface, while also improving the flatness, rigidity, and weather resistance of the mold.

CONFIGURATION DATA

MATERIAL FAMILY	Composite solution
SUPPLY FORM	Tooling
DIMENSIONS / TOLERANCES	Configured to project requirements in SI / metric units
TECHNICAL DOCUMENTATION	Lot- and configuration-specific documentation available with quotation
AVAILABILITY	Made to order / project supply

DOCUMENTATION & COMPLIANCE

ISO, REACH, RoHS and material certificates are confirmed per selected grade, manufacturer, lot and intended application.
