

Sandpaper

Tools for Molding / SC-2B1F6C05F245

PRODUCT OVERVIEW

Sandpaper is an abrasive tool with abrasives as the main grinding component and a substrate as support. Its core function is to grind, polish, deburr, or trim the surface of workpieces through the cutting action of the abrasives, making the surface flat, smooth, or meeting specific roughness requirements. It is widely used in fields such as hardware, woodworking, automobiles, electronics, and furniture, and is a basic tool for surface treatment.

CONFIGURATION DATA

MATERIAL FAMILY	Composite solution
SUPPLY FORM	Tooling
DIMENSIONS / TOLERANCES	Configured to project requirements in SI / metric units
TECHNICAL DOCUMENTATION	Lot- and configuration-specific documentation available with quotation
AVAILABILITY	Made to order / project supply

DOCUMENTATION & COMPLIANCE

ISO, REACH, RoHS and material certificates are confirmed per selected grade, manufacturer, lot and intended application.
